Healthy U

Not quite a building rental, but a 6-week program designed for school groups.

Our Healthy U program teaches children about nutrition; how identify, practice and adapt healthy living habits. We also incorporate health-related fitness skills, and teach children the benefits of physical activity. Using the C.A.T.C.H. curriculum, the program is designed to promote physical activity, healthy food choices, and prevent tobacco use in elementary-aged children. The 6-week program includes gym time and swim lessons.
